Professional Summary

Backend Software Engineer with experience building scalable backend services and production systems using Java, Spring Boot, Python, PostgreSQL and REST APIs. Experienced in client-server architecture, API development, database optimization, automation, and supporting live systems serving millions of players.

Experience

Reliance Games **July 2025 – June 2026**
Junior Software Engineer – Backend *India (Hybrid)*

- Contributed to the live operations of **American Dad! Apocalypse Soon**, a globally published title with **5M+ downloads** on Google Play and **30K+ DAU**, supporting high availability, production troubleshooting, and reliable feature deployments for millions of players.
- Developed scalable backend services using **Java 8, Spring Boot, and Apache Kafka**, implementing **Kafka producers and consumers, topics, partitions, and consumer groups** for asynchronous processing and reliable communication between backend components, with **PostgreSQL** and REST APIs for persistent data and synchronous service interactions.
- Engineered core gameplay systems for the Demon Trials progression feature, implementing Unity **C#** gameplay logic and **Protocol Buffers** for structured request/response payloads, persistence data, and reliable client-server API communication.
- Built end-to-end gameplay and UI flows for the Sidekick Feature, coordinating client scripting, backend API development, and data modelling using **JPA/Hibernate** for relational database persistence.
- Created internal automation tools using **Python**, FastMCP, and LLM-powered assistants to streamline debugging, content validation, and software testing workflows, reducing manual QA effort by **35%**.
- Collaborated through **Agile development, Git-based code reviews, technical discussions, and production troubleshooting** to deliver reliable backend features and resolve application issues.

Best Buy **July 2024 – Jan 2025**
Product Associate *Brampton, ON, Canada*

- Built a **Python automation layer** on top of the **Salesforce REST API** to enable real-time extraction and tracking of sales activity data, maintaining an **87% Net Promoter Score (NPS)**.
- Developed **Alteryx workflows and SQL queries** to analyze sales data, identifying trends and improving operational efficiency by **15%**.
- Engineered a real-time queue management workflow using **Python and Power Automate** during Black Friday, supporting an average monthly sales volume of **$200,000** and a **27% quarterly sales increase**.
- Designed interactive **Power BI dashboards using DAX** to provide data-driven sales insights and support operational decision-making using Google Tag Manager (GTM) and Google Analytics (GA).

CGI **January 2022 – Dec 2022**
Software Engineering Intern *Toronto, ON, Canada*

- Automated infrastructure provisioning and virtual machines using **AWS (S3, EC2, RDS)**, **Terraform**, and **Ansible**, reducing manual environment setup time by **50%**.
- Applied **Postman and SoapUI** for web service and REST API testing, validating API functionality, reliability, and performance.
- Built internal dashboards using **Python and SQL**, integrating JAMA and Jira to monitor CI/CD pipeline health, deployment status, and incident resolution, improving visibility into system operations and production issues.
- Executed **500+ test scripts** using HP ALM, performing **smoke, performance, and regression testing** to validate software reliability and reduce post-deployment support issues.

Projects

VProfile Project | *Vagrant, AWS, Ansible, Docker, Nginx, MySQL, RabbitMQ* **Link**
Architected and deployed a multi-tier web application using **AWS, Docker, Ansible, and Nginx**, implementing a microservices-based architecture for scalable and reliable application deployment.

Virtual Architect AI | *FastAPI, React, TailwindCSS, LangChain, LLM, SQLAlchemy* **Link**
Developed an AI-powered application using **Python, FastAPI, SQLAlchemy, and LLMs**, exposing backend APIs to analyze floor plans and generate intelligent recommendations through an interactive web interface.

Education

York University, Lassonde School of Engineering **Jan 2020 – May 2024**
Bachelor of Engineering (B.Eng) in Computer Engineering, Specialized Honors (3.3/4) *Toronto, ON, Canada*

Technical Skills

Languages: Java 8, Python, SQL, JavaScript, C#, C/C++, Bash
Backend & APIs: Spring Boot, Flask, FastAPI, REST APIs, Apache Kafka, Kafka Producers/Consumers, Topics, Partitions, Consumer Groups, JPA/Hibernate, Protocol Buffers
Databases: PostgreSQL, MySQL, MongoDB, Redis, Guava
Cloud & DevOps: AWS (EC2, S3, RDS, Route 53), Docker, Kubernetes, Terraform, Ansible, Jenkins, CI/CD, Linux/Ubuntu
Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, SOLID Principles, Design Patterns, System Design, Distributed Systems, Agile, SDLC
Testing & Tools: Git, GitHub, Postman, SoapUI, HP ALM, Splunk
AI & Automation: LLMs, LangChain, FastMCP, MCP, Claude API, GitHub Copilot, Python Automation

Certifications

- **Microsoft AZ-900 (Azure Fundamentals)**
